

Q1 Where do you perform WALANT type services? (Wide Awake Local and No Tourniquet) (e.g., carpal tunnel release)

Answered: 49 Skipped: 0

ANSWER CHOICES	RESPONSES	
In-Office	16.33%	8
Surgery Center	53.06%	26
Hospital	6.12%	3
Other Settings:	24.49%	12
TOTAL		49

Q2 If the case is performed in a surgery center, does the patient get an IV?

Answered: 37 Skipped: 12

ANSWER CHOICES	RESPONSES	
Yes	43.24%	16
No	56.76%	21
TOTAL		37

Q3 Do you routinely give your patients pre-op antibiotics for softtissue elective surgeries (e.g., carpal tunnel release, trigger finger release, etc.)?

Answered: 49 Skipped: 0

ANSWER CHOICES	RESPONSES	
Yes	44.90%	22
No	55.10%	27
TOTAL		49

Q4 If yes, what antibiotics are administered?

Answered: 23 Skipped: 26

RESPONSES DATE

1	Ancef	12/14/2019 8:02 AM	
2	Ancef (Cefazolin) 1 Gram IVPB.		12/13/2019 5:06 PM
3	Cipro	12/13/2019 3:56 PM	
4	Ancef	12/13/2019 3:34 PM	
5	keflex	12/13/2019 3:17 PM	
6	Ancef	12/13/2019 2:08 PM	
7	Ceflosporin	12/8/2019 8:22 AM	
8	Keflex	12/7/2019 9:02 PM	
9	ANCEF	12/7/2019 4:35 PM	
10	Oral Keflex	12/7/2019 7:39 AM	
11	Ancef	12/6/2019 9:43 PM	
12	Ancef or Clindamycin based on weight and allergies	12/6/2019 9:35 PM	
13	Ancef	12/6/2019 9:34 PM	
14	Ancef	12/6/2019 9:20 PM	
15	Keflec 500 po	12/6/2019 8:41 PM	
16	Keflex	12/6/2019 7:15 PM	
17	Ancef	12/6/2019 3:57 PM	
18	oral keflex, three doses.	12/6/2019 3:19 PM	
19	ancef	12/6/2019 2:35 PM	
20	keflex	12/6/2019 2:19 PM	
21	NA	12/6/2019 1:41 PM	
22	Ancef	12/6/2019 1:38 PM	
23	ancef	12/6/2019 1:24 PM	

Q5 If no, why not?

Answered: 25 Skipped: 24

RESPONSES DATE

- 1 not necessary 12/10/2019 11:57 PM
- 2 No evidence to support benefit. Potential risk of adverse drug reaction is not warranted. 12/9/2019 7:48 PM
- 3 Research does not support their use. 12/8/2019 9:56 PM
- 4 not needed. negative history for infections 12/7/2019 1:15 PM
- 5 Antibiotics not indicated unless there are risk factors. Need to diminish risk of creating resistant organisms. 12/7/2019 11:55 AM
- 6 Literature doesn't support it for CTR/A1 pulley incision 12/7/2019 8:22 AM
- 7 Studies show minor soft tissue hand procedures do not need antibiotics 12/7/2019 7:34 AM
- 8 ASSH guidelines are followed 12/7/2019 7:20 AM
- 9 Evidence supports there's no benefit 12/7/2019 3:44 AM
- 10 I only give preoperative antibiotics in patients with diabetes or if I am implanting hardware 12/6/2019 8:51 PM
- 11 Not indicated in most circumstances 12/6/2019 5:45 PM
- 12 no need 12/6/2019 4:56 PM
- 13 not needed 12/6/2019 4:32 PM
- 14 Why? 12/6/2019 3:28 PM
- 15 literature does not support using them. 12/6/2019 2:59 PM
- 16 Do not need abc 12/6/2019 2:38 PM
- 17 No evidence they help 12/6/2019 2:33 PM
- 18 no need to 12/6/2019 2:28 PM
- 19 Literature is pretty convincing that antibiotics are not necessary for simple soft tissue procedures of the hand where the procedure is primarily incisional 12/6/2019 2:25 PM
- 20 not indicated 12/6/2019 2:19 PM
- 21 Not indicated 12/6/2019 1:58 PM
- 22 They are not indicated for these procedures, per peer reviewed literature. 12/6/2019 1:47 PM
- 23 Literature does not show any benefit in reducing risk of infection for "simple" soft tissue procedures with administration of antibiotics. 12/6/2019 1:45 PM
- 24 EBM shows not needed 12/6/2019 1:41 PM
- 25 Not needed per literature 12/6/2019 1:23 PM
