Sports Medicine Fellow Looking to Practice in Northern California

Posted 1/2023

I will be finishing my Orthopaedic Sports Medicine Fellowship at Kerlan Jobe in July 2023 and looking to move back into Northern California after this to start my career close to home.

My clinical interests lie in shoulder (arthroscopic, open, and arthroplasty procedures), elbow (trauma and throwing elbow), hip arthroscopy, and knee procedures. I am also interested in teaching the next generation of surgeons, clinicians, and health care providers in order to build upon our successes.

Outside of work, I love to play basketball, tennis, go to the beach, and play with our dog.
